

Senior Full-Stack Engineer with **3.9 years** of experience architecting and delivering scalable web, mobile, backend, and AI solutions, with expertise in logistics platforms, cloud infrastructure, and technical leadership.

TECHNICAL SKILLS

Skills : Dart, Flutter, BLOc, Play Store, App Store, ReactJs, Typescript, Zustand, HTML/CSS, VITE, NodeJs, Python, Rest API, Git/Github, AWS, Docker, N8N, RAG Systems, Pinecone, Gemini, PostgreSQL, MongoDB, Firebase, SQL, Supabase,

AI Tools : Claude-Code, Codex, Antigravity, Cursor, Chat Gpt, Gemini

IDEs : VS code, Android Studio

WORK EXPERIENCE

BotAi Solutions Private Limited - Sr. Software Engineer

June-2024 - Present

Placed full-time at the client site, **Shree Maruti Integrated Logistics (SMILe)**, one of India's leading logistics companies. I was responsible for multiple roles, including project management, leading the front-end team, and serving as a pseudo lead for the backend team. I worked on **Android** and **iOS** applications using **Flutter**, web applications using **React.js**, and **REST APIs** using **Node.js**. I also maintained several services built with **Golang** and **Python**.

BlazePost (Courier Booking Platform): SMILe's Channel Partners (CPs) handle courier bookings across India, processing approximately **150,000 orders daily**. Served as the **Front-End Lead** while also contributing to **backend development**. Developed key backend features, including **pincode** and **zone management systems** - Built a **silent thermal sticker printing** solution that automatically prints shipping labels immediately after an order is booked, eliminating manual printing and significantly improving operational efficiency.

Technologies: **React.js, Node.js, Java Spring Boot, Grafana, Kestra, AWS, ZPL (Zebra Programming Language).**

SMILe CP APP (Mobile version of Blaze post): [Android App](#) [IOS App](#)

This is the mobile version for blaze-post **completely owned and managed by me**. This app is build in **flutter**

Prayog: Led the development of a multi-tenant white-label logistics platform that enables logistics businesses to launch branded booking and tracking solutions. **Managed the front-end team** and provided technical **guidance to the backend team**. Built key features including **multi-carrier integrations, RBAC, API key** management, an [API Playground](#), and a **COD Management System** covering booking, cash collection, reconciliation, and settlement. Also developed an AI-powered **RAG documentation** assistant using **n8n** and **Gemini API**. Deployed and managed services on **AWS**.

Technologies: **React.js, Node.js, Python, Golang, PostgreSQL, AWS, n8n, Gemini API.**

Anjita It Solutions - Flutter Developer

July-2023 - May 2024

As a flutter developer my task is mainly develop and maintain the apps in flutter. Handling clients query, Creating API structure and database structure, research and development out of flutter is my part of job.

Health parliament [Play store link](#) [App Store Link](#)

Health parliament is app developed for medical professionals. In this app users from medical related fields can create account and explore a new way to connect other medical professional. **Features** - Custom Authentication (Email verification) , Creating Community (PDF), Chatting, Log In/Sign In , Like/Comment/Share, Payment Integration (Razor pay), Blogs /News , Surveys , Profile privacy set visibility for sensitive data, Blocking account, tagging, Notification

Humrahi [Play store link](#) [App Store Link](#)
